

Accessing recordings on Zoom Events

Unfortunately, recordings can only be viewed through Zoom Events on a laptop or PC. Recordings will be available to view within Zoom Events for 7 days from the end of the conference.

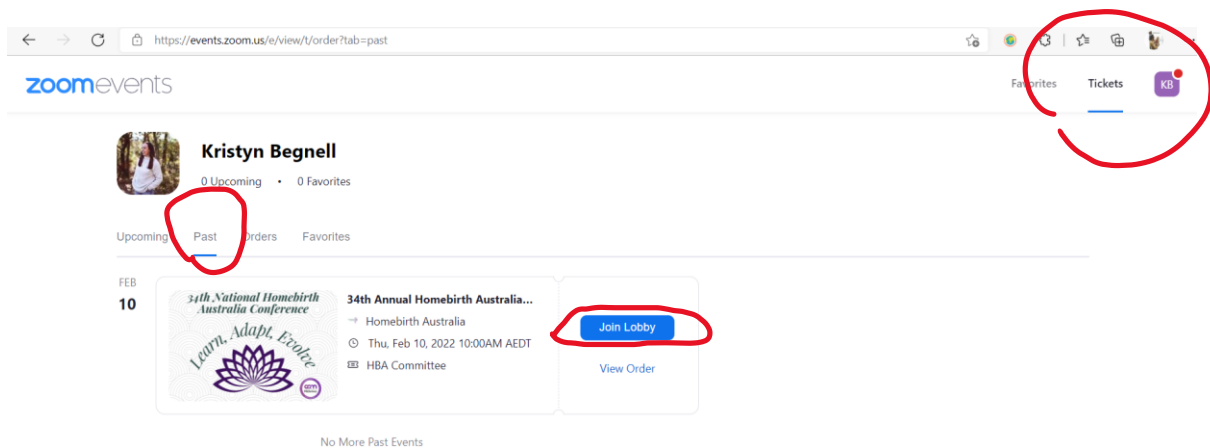

Conference recordings will be available on the Homebirth Australia members section within the next 2 weeks. HBA membership is included in your ticket price, so you will receive an email with your log in details and instructions to view recordings when they are ready. Access to the recordings will be available for 3 months.

We appreciate your patience while we organise this.

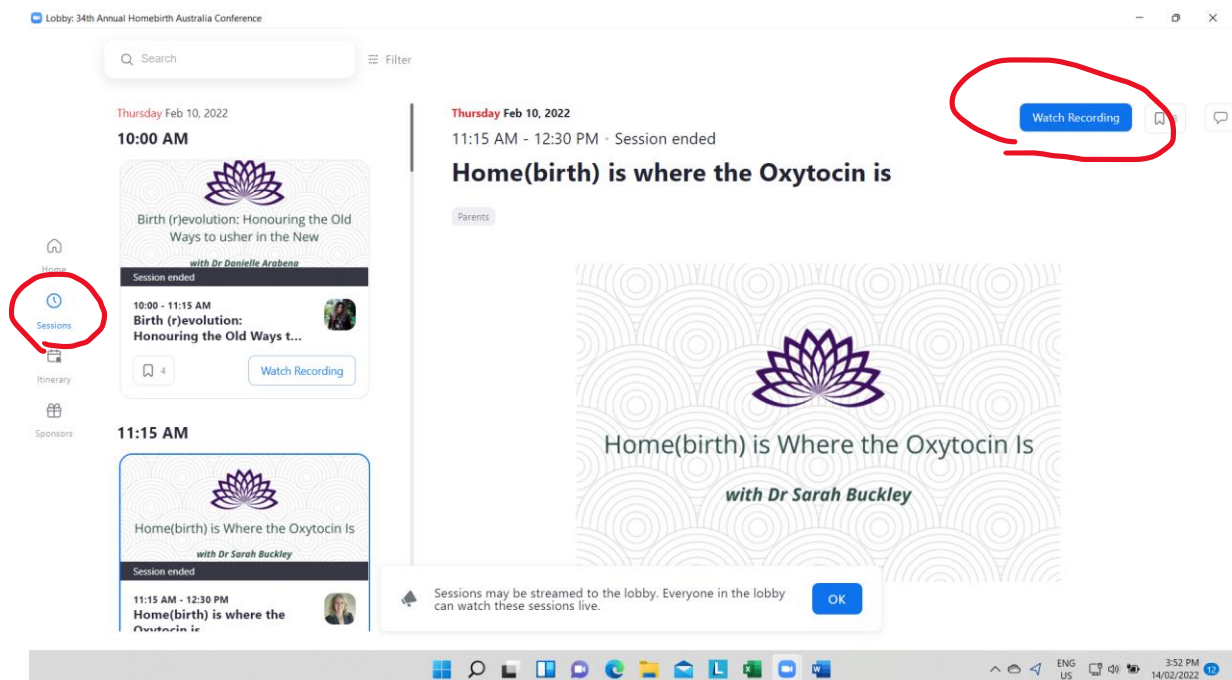

1. Go to the Order Confirmation email you received from Zoom Events when you purchased your conference ticket. Click on **View Ticket**

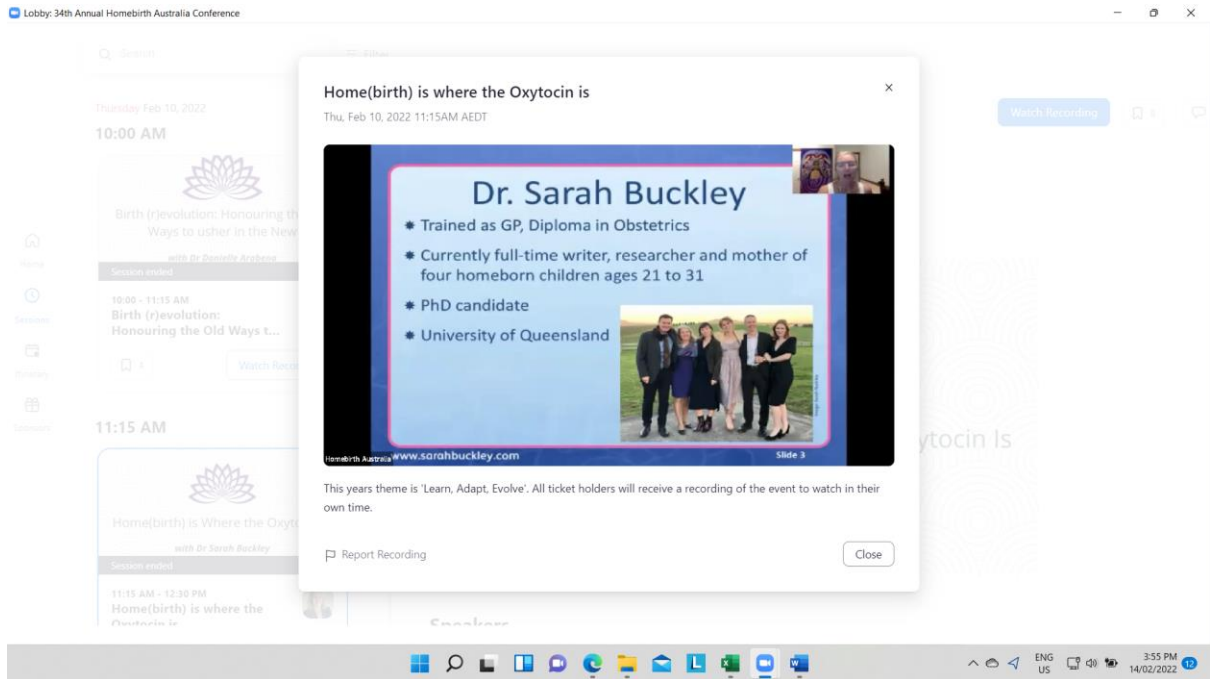

2. Log into Zoom Events using the Zoom log in you used when purchasing your tickets. Click on **Tickets** (top right) then **Past** to view the conference event. Click on **Join Lobby**

3. This will open the Zoom app on your PC (if this does not work, you may need to update the Zoom app and restart your computer)

4. Click on the **Sessions** icon on the left of the screen and find the session recording you want to view. Then click **Watch Recording**.

Enjoy watching the content! Please remember to complete the surveys after each session so we can take your feedback on board for next year's conference.

Please let us know if you have any trouble accessing recordings after following these instructions by emailing coordinator@homebirthaustralia.org with a screen shot of the issue.
